DWF  
leading tech  
offering

## Your mission critical goals

- Mobile incident notification
- Risk & compliance distribution tracking
- Multi-site
- Continuous improvement
- Training tracking
- Site induction & onboarding
- Audit & inspections
- Crisis response
- Document repository & correspondence handling
- Easy cloud-based access
- Quick, flexible setup
- Automated reporting
- Heatmap trend analysis
- GDPR ready
- Compliance focused Microsoft tech stack

## Mobile Incident Notification

Incidents can happen at any time but EvoSafe is always working 24/7.

Dealing appropriately with an incident is about fast identification and action.

With many people requiring a mobile solution to their every day working requirements, EvoSafe is designed to involve you as soon as possible whether you are at your desk or up on a roof.

Mobile incident notification makes the process of dealing with an issue fast and transparent for all people involved in the process.

## **Risk & Compliance Delegation Handling**

EvoSafe already knows who is responsible for what and delegates accordingly.

With a complex range of compliance requirements from building safety to machine operating requirements, our software understands exactly who is responsible for what.

Ensuring that all responsible parties are fulfilling their requirements within the appropriate timescales is an essential part of both good communication and also keeping you fully compliant.

## Multi-site

Keeps H&S managers operating to the same high standards wherever they are based.

Health and Safety requires your people to work in a very precise manner regardless of the location they are based at. Some have more items for PAT testing whilst others may potentially report more accidents from outside contractors rather than staff.

EvoSafe keeps everyone fully aligned and focussed on the required tasks with automated tasks and reporting to ensure you maintain the same high standards across all of your sites.

## Continuous Improvement

Easy biannual reporting and effortless continuous improvement.

Organising a biannual health and safety audit can be a stressful affair, but with EvoSafe's intelligent software, the dizzying job of keeping track of everything is done for you.

Continuous Improvement is easily achieved by monitoring KPI's in real-time and flagging action points in a timely and organised fashion. Delegated tasks and varying permission levels create a robust and automated reporting structure that empowers your people to concentrate on the most important issues.

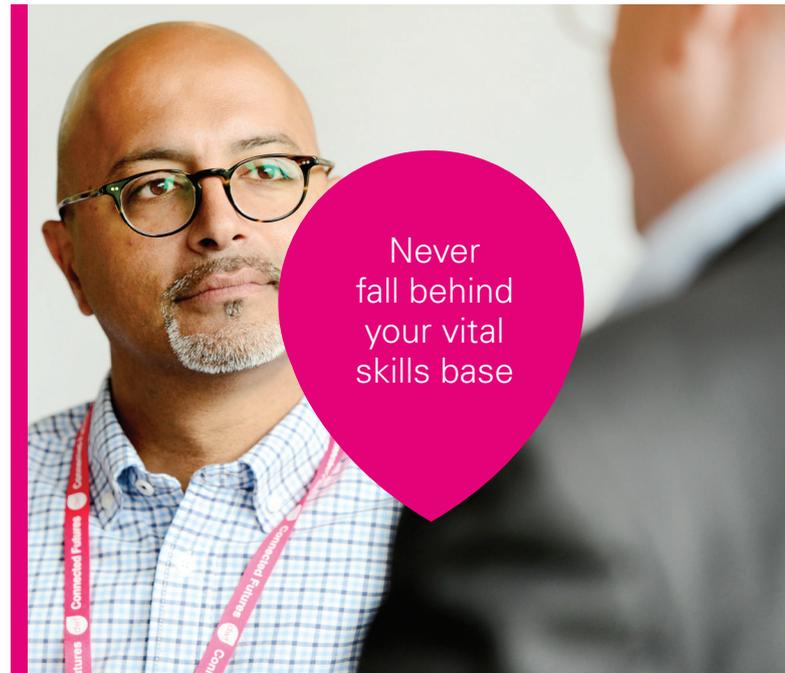

## Training Tracking

Vital training requirements will never be missed with our training tracking.

It is rare that an organisation only has one or two people responsible for health and safety. Often, there are a range of people looking after specific locations as well as areas of specialism. Usually, health and safety is only one part of their daily routine.

EvoSafe operates a skills matrix which can be mapped to both your location requirements and those of the individual whether a manager, contributor, new starter, contractor or temp.

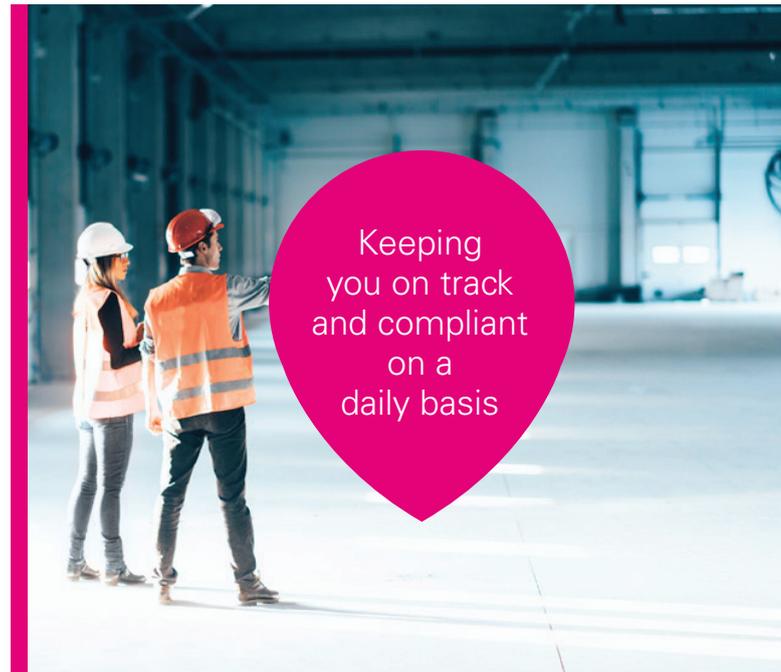

## Site Induction & Onboarding

Smoother H&S onboarding and site inductions for effortless compliance.

Depending on the size of your organisation, new starters, temporary workers, contractors and visitors all have different requirements under health and safety legislation. EvoSafe keeps track of them all and creates action lists depending on the scenario. It will also delegate to the relevant managers and red flag if actions are not taken.

Real-time reporting keeps you fully up to date and on top of everything.

## Audit & Inspections

Always be fully prepared for a range of different key dates throughout your year.

By correct delegation of key action points throughout your regular operations, EvoSafe notifies the relevant managers and delegates of their responsibilities.

Our management dashboards display a helpful, at-a-glance RAG (red, amber, green) system for early response and more effective pre-planning.

Findings, recommendations and further actions can easily be followed up and the system also red flags any potential hotspots.

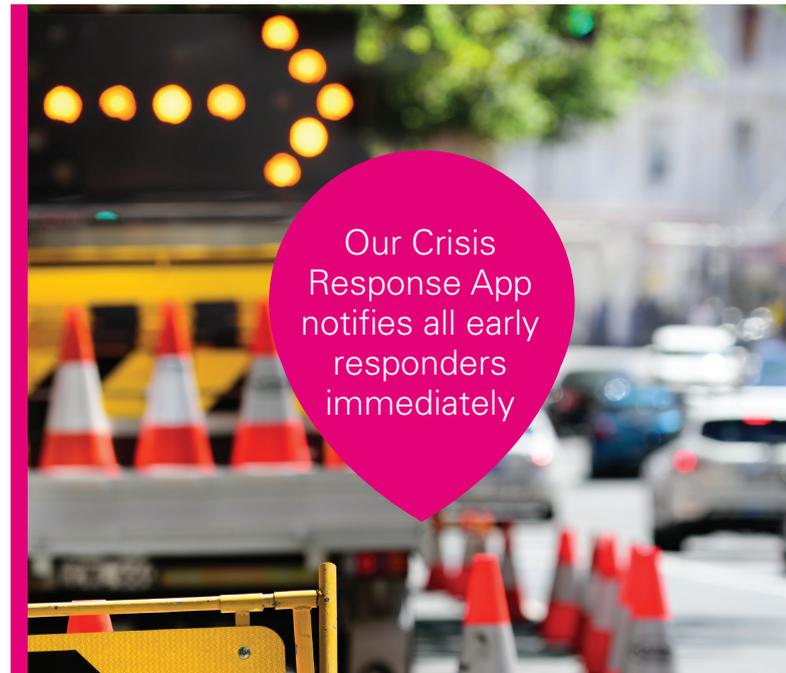

## Crisis Response

A watertight plan comes from communication and planning.

From the moment you activate our Crisis Response system it invokes immediate Legal Privilege to protect your interests, property and people.

Through diligent pre-planning we have prepared a series of scenario responses which notify all key personal required to spring into action.

Updates are quickly shared around your early responder group and action points are clear and concise.

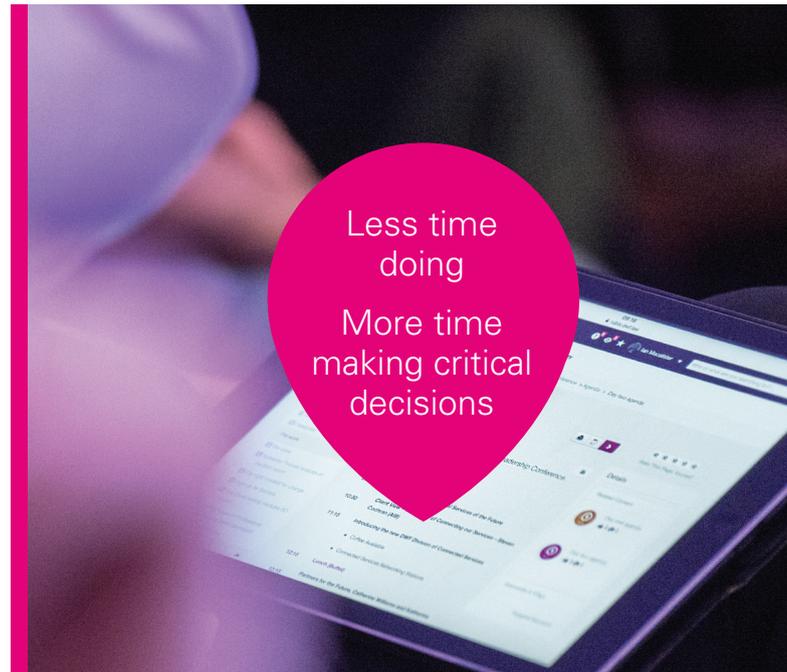

## Document Repository & Correspondence Handling

With a central document resource, all parties are fully informed.

A version controlled, centralised document repository ensures key actions and associated documents are always completely up to date.

This is particularly handy where communication between parties may potentially be compromised, such as when third parties are involved which is why we include collaboration and change tracking.

The platform integrates easily with existing Document Management Systems (DMS) including Microsoft Sharepoint.

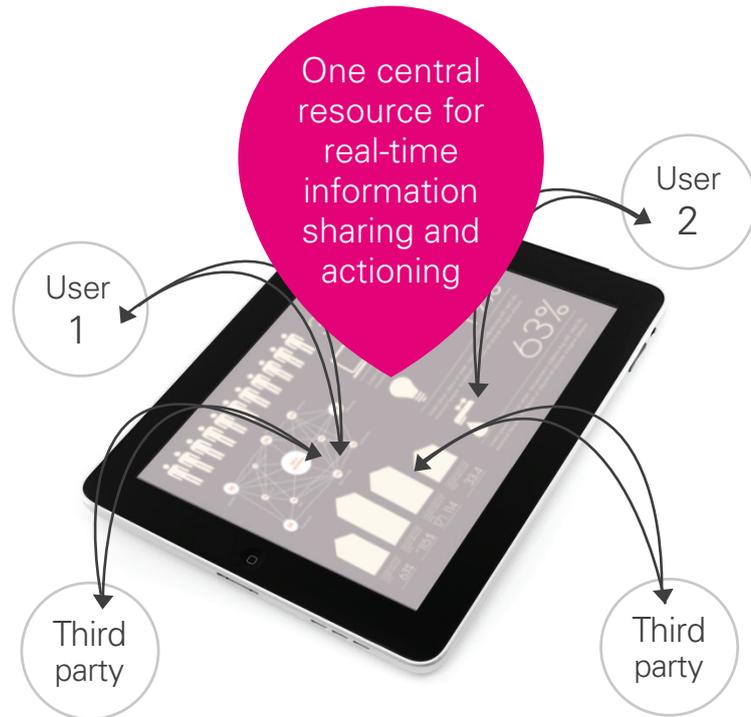

## Easy Cloud-Based Access

Collaborate, communicate, delegate and track securely across departments.

The web portal uses multi-level permissions to process specific case files allowing viewing, uploading and downloading of documents plus access to detailed management information.

Keep all your third parties, claimants and solicitors fully updated, including the option of SMS alerts. Email and letter templates are available throughout the workflow. EvoSafe understands that key personnel may even be out of the country but require instant access for swift decision making.

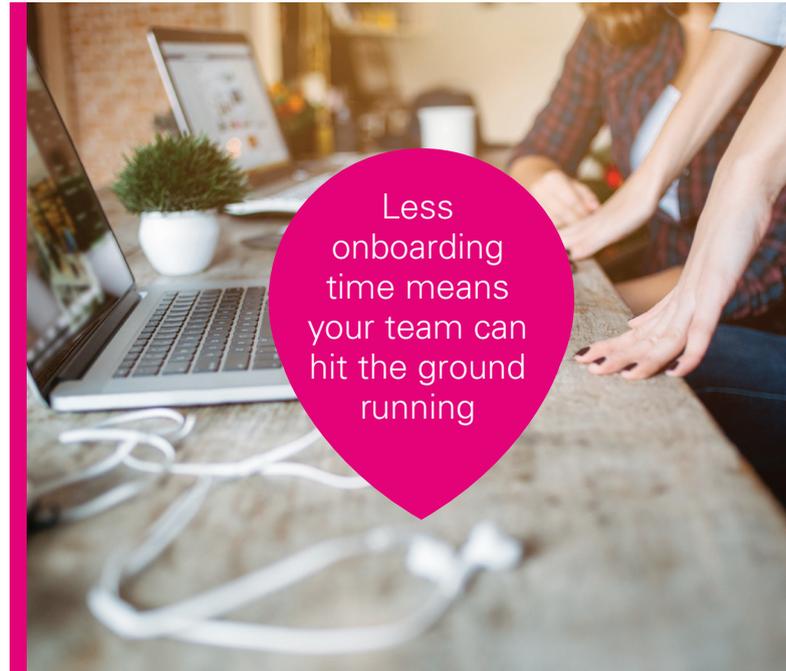

## Quick, Flexible Set Up

Simple, intuitive and consistent with your existing processes.

EvoSafe has been developed on the Microsoft Technology Stack offering unrivalled, quick and simple integration which leaves us more time to configure the system to your unique requirements.

We find that staff are happy to adapt quickly to our platform with its intuitive functionality, simple navigation and a crisp, clean look. Users (including third party contractors) each can get a personalised dashboard to keep track of their workload with priorities set using a simple red, amber, green (RAG) status.

## Automated Reporting

Configurable reports are generated automatically for improved efficiency.

Typically, the biggest complaint from managers is the length of time it takes them to produce reports, even the scheduled ones.

Our reporting dashboard can be configured to the individual managers requirements to deliver automated reports to a diary plan as well as "real-time," at-a-glance information for improved efficiency.

## Heatmap Trend Analysis

EvoSafe's built-in analytics tool helps to highlight incidents in problem areas.

By geotagging the precise location of the incident, EvoSafe correlates the data to identify problem accident hotspots enabling your people to refer for further investigation and recommend suitable changes in practice or environment.

## GDPR Ready

Improved data mapping and auditing for watertight data management.

EvoSafe helps you maintain GDPR compliance, not just through the cloud-based, one source, data repository but also through automated flagging, delegation and action points.

Have the confidence to deal with subject access requests quickly and efficiently without impacting negatively on your productivity.

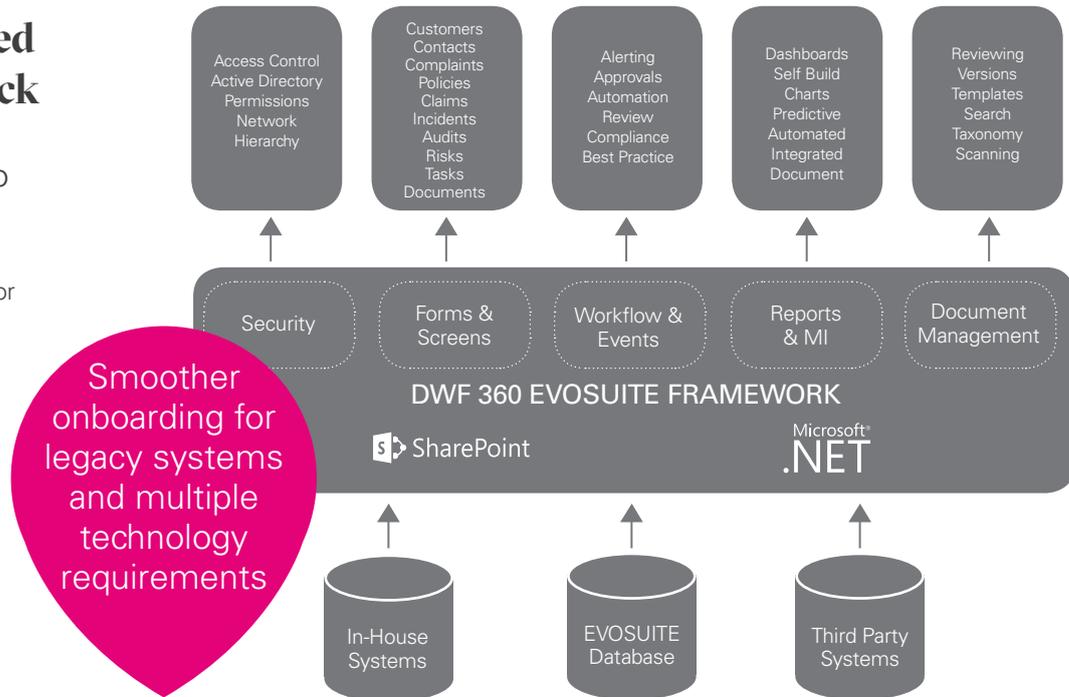

## Compliance Focused Microsoft Tech Stack

Robust code, ready to go for greater project value.

Due to our long-term multi-sector experience, we have developed an industry specific software framework with a robust library of pre-coded functionality and processes at its core.

Being highly flexible and configurable, the platform improves productivity and reduces developer time, so you get a bespoke build at an off-the-shelf cost.

# "You're in good company"

## Accreditations and Best Practice

## A robust suite of software products for risk reduction and workflow management

- Reduce claims impact and cost
- Mitigate risks relating to incidents or claims
- Legal privilege protection
- Track & trace all action compliance & progression
- Light touch incident & claim processing
- Predict outcomes
- Finger on the pulse via self-service reporting
- Quick and easy to use for efficient adoption

## About us

We are a global legal business, transforming legal services through our people for our clients.

Led by Managing Partner and CEO Andrew Leitherland, we have over 25 key locations and 2,700 people delivering services and solutions that go beyond expectations.

By questioning traditions and thinking beyond conventions, we achieve outstanding levels of innovation. We have received recognition for our work by The Financial Times who named us as one of Europe's most innovative legal advisers.

DWF 360, our IT solutions and software business, is part of Connected Services, a specialist division of DWF offering

a range of stand-alone consultative services, technology and products in addition to the traditional legal offering.

We connect on a global scale, sharing our knowledge and technical expertise to identify and anticipate challenges. We are finding new solutions for clients within eight core sectors including Energy and Industrials, Financial Services, Insurance, Public Sector, Real Estate, Retail, Food & Hospitality, Technology and Transport.

Join us on our shared journey to redefine legal services and you'll benefit from the most innovative thinkers, technical experts and sector specialists.

DWF: Transforming legal services through our people and our clients.
